About us

- The Department of Earth Sciences at IIT Kanpur focuses on the study of the Earth, encompassing its evolution and internal dynamics, its surface as well as subsurface processes, emphasizing natural and human-induced transformations of the terrestrial environment vis-a-vis sustainable development, given the biggest problem we face in terms of rapidly increasing population.

Objectives

- Integration of quantitative approaches and techniques across various earth systems and applications of geological, geophysical, and other related analytical methods. Training students and developing an aptitude for conjunctive use of field, experimental, analytical, and numerical approaches.
- Providing industry and research-oriented manpower in various fields of Earth Sciences.

Dr. Debajyoti Paul
Professor and Head
Department of Earth Sciences, IITK

"The BS-MS and M.Tech. students of the Department of Earth Sciences, IIT Kanpur get through academic training that includes course works on fundamental and applied Earth Sciences as well as hands-on training on analytical techniques relevant to our society. Particularly, they learn about natural resources (identification and exploration techniques), Solid earth geology, Quaternary geology, Sedimentology and Basin analysis, Natural Hazards, and Applied geochemistry, etc. Our students are well-trained with the theoretical aspects of hydrocarbon exploration from the basic to advanced stages, theoretical and practical Rock Mechanics, Rock Physics, and different geophysical exploration techniques with laboratory-based components. They visit several exploration industries, their mining sites, and beneficiary plants. In our teaching program, field geology is one of the essential components with emphasis on geological mapping and interpreting geological structures. IIT Kanpur campus environment encourages students to develop as better human beings, leaders, and team members."

Research Scholar Day 23

Prof Shyam S. Rai (IISER Pune)

**Dr. Joyesh Bagchi
By Director- GSI, Lucknow**

The Research Scholar Day 2023 was a day-long event that brought together researchers, scholars, and students to showcase their work, discuss new ideas and developments, and collaborate on future research projects. The event featured talks from leading researchers in the field of Earth Sciences, as well as poster presentations and interactive sessions that allowed attendees to learn about the latest research and network with their peers.

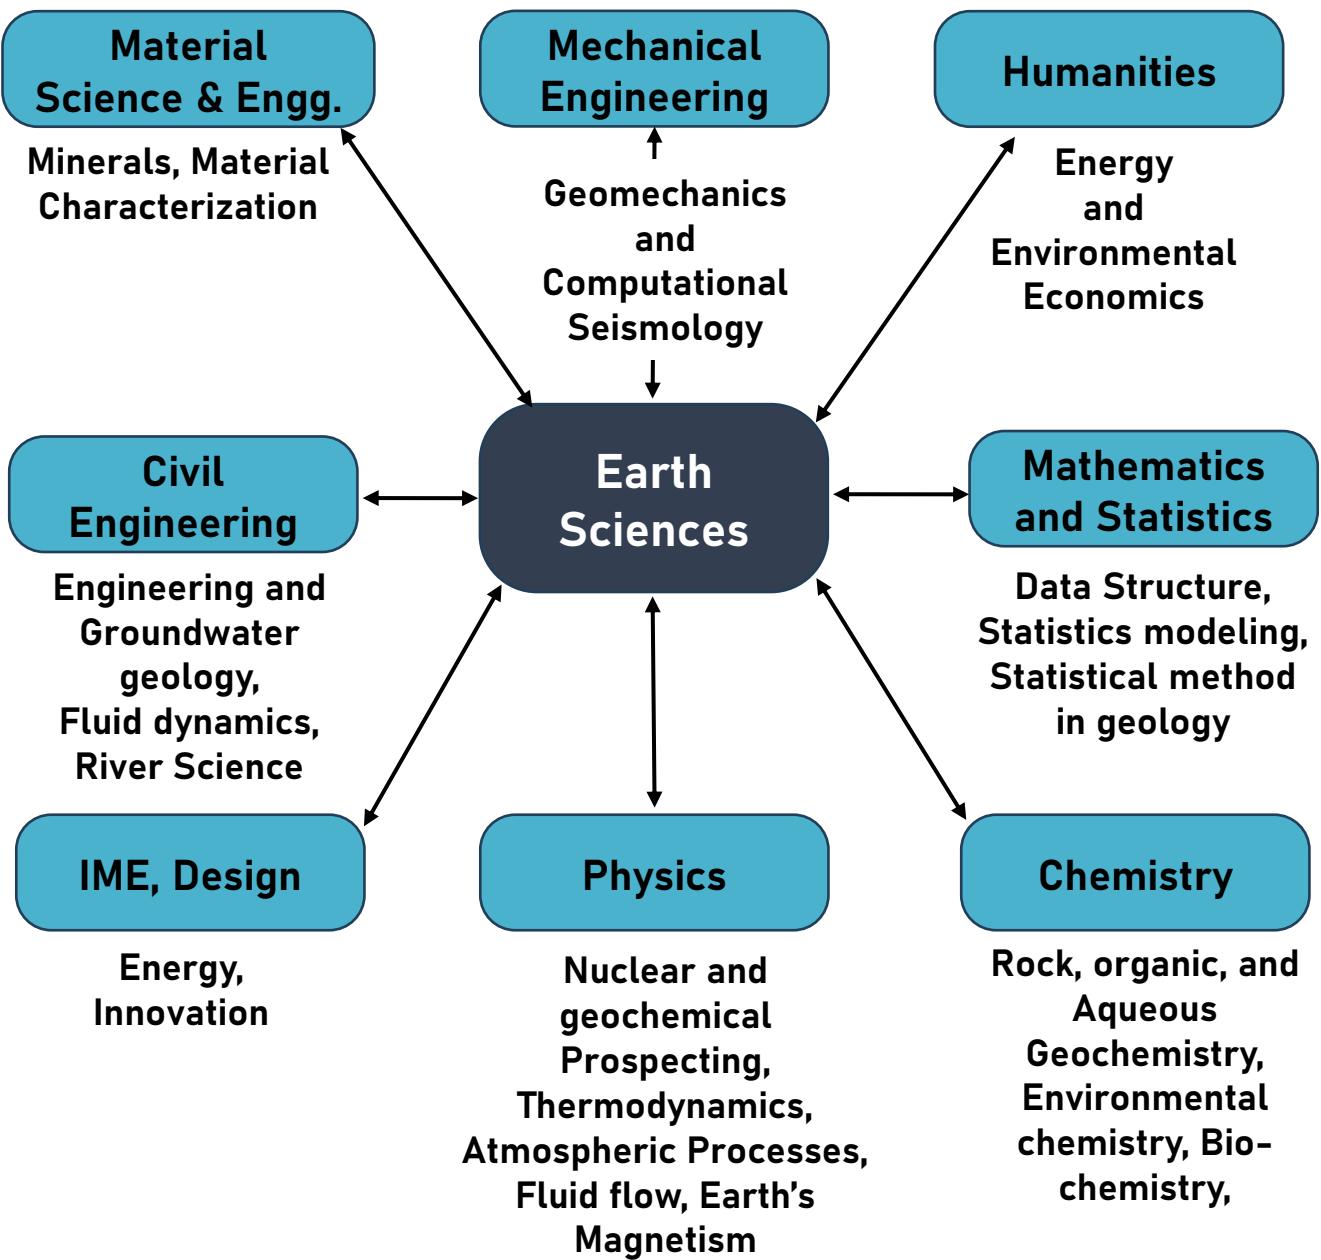

Schlumberger Day

The IIT Kanpur, Earth Sciences department celebrated Schlumberger day in 2018 and 2019, where the students got the opportunity to participate in technical events like the case study presentation related to the geoscience domain.

The department is now looking towards spreading roots and establishing a promising relationship with the major oil and gas companies in India and abroad.

Field Photos

Field geology is vital for geologists as it directly gives them experience (evidence) of both endogenic and exogenic processes. It allows them to observe present and past geological processes, collect first-hand data to interpret the dynamic processes of the Earth to uncover valuable insights about its history and resources.
