

Placement Brochure 2026–27

Bachelors of Science
Statistics & Data Science

INDIAN INSTITUTE OF TECHNOLOGY KANPUR

Welcome Message

Prof. Neeraj Misra

Head of the Department, SDS

✉ head_sds@iitk.ac.in

☎ +91-512-2594433

Welcome to the Department of Statistics and Data Science (SDS) at IIT Kanpur! The establishment of our independent department marks a significant milestone in the history of IIT Kanpur, reflecting the growing importance of the Statistical Sciences in an increasingly data-driven world.

We carry forward a legacy of internationally recognized contributions to mathematical research. Our rigorous Bachelor of Science (BS) and dual degree (BS-MS) programs are meticulously designed to cultivate a profound mathematical mindset.

We train our students in advanced probability, stochastic processes, and high-performance computing, ensuring exceptional readiness for real-world industry challenges.

Our graduates are rigorously trained in advanced probability, stochastic calculus, and high-performance computing, making them exceptionally well-equipped for the fast-paced, complex problem-solving demanded by quantitative finance and algorithmic trading.

About the Program

The Department of Statistics & Data Science at IIT Kanpur is a premier academic center dedicated to advancing education and research in theoretical statistics, probability, and computational mathematics.

By combining deep theoretical foundations—such as measure theory, stochastic modeling, and advanced inference—with computationally demanding applications in C++ and Python, we prepare students for high-impact careers in algorithmic trading, quantitative research, and technology.

BS-MS / BS in Statistics & Data Science

- ▶ **Duration:** 4 Years (BS) / 5 Years (BS-MS Dual Degree)
- ▶ **Admission:** Exclusively through JEE (Advanced) (Top 1%)
- ▶ **Minors:** Computer Science, Economics, Engineering
- ▶ **Rigorous Foundation:** Built on uncompromising theoretical foundations in probability theory, mathematical statistics, and matrix algebra.

Technical & Analytical Skills

TECHNICAL TOOLS & LANGUAGES

ANALYTICAL COMPETENCIES

- ▶ **Quantitative Finance & Stochastic Modeling:** Advanced stochastic calculus, Monte Carlo simulations, derivatives pricing models, and rigorous quantitative risk analytics.
- ▶ **Time Series & Statistical Arbitrage:** High-frequency data analysis, volatility modeling (GARCH), statistical arbitrage strategies, and dynamic trend forecasting.
- ▶ **Algorithmic & Low-Latency Engineering:** High-performance computing, memory optimization in C/C++, parallel programming, and algorithm complexity reduction.
- ▶ **Data Modeling & Machine Learning:** Bayesian inference (MCMC), predictive data modeling pipelines, deep reinforcement learning, and convex optimization for Big Data.

Courses Undertaken

Core Courses

- Probability Theory
- Sampling Theory
- Stochastic Processes
- Statistical Computing
- Time Series Analysis
- Linear Regression & ANOVA
- Statistical Inference
- Bayesian Analysis
- Multivariate Analysis
- Real Analysis
- Complex Analysis
- Matrix Algebra & Linear Estimation
- Data Science Lab 1
- Data Science Lab 2
- Data Science Lab 3

Department Electives

- Statistical Pattern Recognition
- Markov Chain Monte Carlo
- Spatial Statistics
- Artificial Neural Networks & Machine Learning for Differential Equations
- Statistical Decision Theory
- Stochastic Calculus
- Order Statistics
- Econometrics
- Nonlinear Regression
- Statistical Reliability Theory
- Data Mining
- Non-Parametric Inference
- Empirical Processes
- Set Theory & Discrete Mathematics
- Ordinary Differential Equations
- Partial Differential Equations
- Measure Theory
- Game Theory

Institute Open Electives

- Parallel Computing & Programming
- Computer Vision & Image Processing
- Big Data Analysis
- Probabilistic Modelling & Inference
- Introduction to Machine Learning
- Probabilistic Machine Learning
- Statistical Natural Language Processing
- Statistical Signal Processing
- Digital Image Processing
- Convex Optimization
- Detection & Estimation Theory
- Speech Signal Processing
- Computational Intelligence
- Neural Networks
- Optimization for Big Data
- Artificial Intelligence, Machine Learning & its Applications
- Advanced Topics in Machine Learning
- Principles of Database Systems
- Embedded & Cyber-Physical Systems
- Theory of Computation
- Bayesian Econometrics
- Advanced Algorithms
- Randomized Algorithms
- Computer Organisation
- Software Engineering
- Computational Complexity
- Computational Number Theory
- Modern Cryptology
- Applied Macroeconomics
- Generative Artificial Intelligence
- Data Structures & Algorithms
- Derivatives Pricing
- Accounting & Finance
- Large Language Models
- Foundations of Modern AI

Profiles Offered & Statistics

Industry Distribution

Compensation Highlights

Past Recruiters

Our students are consistently sought after by High-Frequency Trading firms, quantitative hedge funds, and top global technology companies.

Placement Timeline 2026-27

The placement season at IIT Kanpur is structured to ensure a smooth transition for students from academia to the professional world.

September 2026

Company Registration

1st Week of September 2026: Companies register on IITK's Recruitment Automation System (RAS) portal and share detailed Job Descriptions for prospective profiles.

Oct - Nov 2026

PPT & Online Aptitude Tests

Companies conduct their Pre-Placement Talks (PPTs) and initiate online screening processes, technical tests, and aptitude assessments after finalizing schedules with the placement cell.

December 2026

Offline Interviews

1st Week of December 2026: The placement office allots dates for conducting in-person, offline interviews on campus. Offers are finalized and extended during this period.

Distinguished Faculty

The department takes pride in its distinguished faculty, which forms the foundation of our educational excellence. Our faculty's diverse research interests span both pure and applied mathematics and statistics.

FACULTY NAME	POSITION	PH.D. INSTITUTION	EMAIL ID
Dr. Neeraj Misra	Professor & Head	IIT Kanpur	neeraj@iitk.ac.in
Dr. Amit Mitra	Professor	IIT Kanpur	amitra@iitk.ac.in
Dr. Sharmishtha Mitra	Professor	IIT Kanpur	smitra@iitk.ac.in
Dr. Shalabh	Professor	University of Lucknow	shalab@iitk.ac.in
Dr. Debasis Kundu	Professor	Penn State University	kundu@iitk.ac.in
Dr. Subhra Sankar Dhar	Professor	ISI Kolkata	subhra@iitk.ac.in
Dr. Dootika Vats	Associate Professor	Univ of Minnesota	dootika@iitk.ac.in
Dr. Arnab Hazra	Assistant Professor	NC State University	ahazra@iitk.ac.in
Dr. Suprio Bhar	Assistant Professor	ISI Bangalore	suprio@iitk.ac.in
Dr. Soumyarup Sadhukhan	Assistant Professor	ISI Kolkata	soumyarups@iitk.ac.in
Dr. Satya Prakash Singh	Assistant Professor	IIT Bombay	singhsp@iitk.ac.in

Let's Get In Touch

We invite leading organizations to partner with the Department of Statistics & Data Science, IIT Kanpur, for the upcoming placement season.
